PROFESSIONAL SUMMARY

Computer Science Engineering graduate with practical experience building AI-integrated and full-stack web applications using Python, Django, PHP, and SQL. Adept at designing end-to-end systems — from database architecture and backend logic to frontend interfaces — with a strong focus on clean, modular code. Actively seeking a Software Engineering role to contribute to product development in a fast-paced environment.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL
Web & Frameworks: HTML, CSS, Django
Databases: MySQL, SQLite
Tools & Platforms: Git, GitHub, Vercel, PythonAnywhere
Operating Systems: Windows, Linux (Installation, Configuration, Basic Administration)
Productivity Tools: MS Word, MS Excel, MS PowerPoint

PROJECTS

AI-Based Health Advisor

Python · HTML/CSS · CSV Datasets

- Built a full-stack health recommendation platform where users input symptoms and receive tailored medicine and diet suggestions powered by a Python-based recommendation engine.
- Designed backend logic using multiple CSV datasets to accurately map user-reported conditions to relevant treatment options, ensuring reliable and contextual recommendations.
- Implemented secure user authentication via PHP and HTML; delivered a modular, clean UI integrating frontend and backend into a cohesive, user-friendly application.

Farmer Market Portal

HTML · CSS · JavaScript · MySQL

- Developed a web-based marketplace connecting farmers directly with customers, eliminating intermediaries and enabling seamless listing, browsing, and purchase of agricultural products.
- Built a dual registration system with role-based access, product listing and management modules, real-time pricing updates, and secure MySQL-backed data management.

Legal Judgment Prediction System

Python · Django · MySQL

- Developed a Django web application that predicts legal case outcomes using AI, allowing users to upload case files and receive real-time judgment predictions through an intuitive interface.
- Architected a modular backend with secure authentication, MySQL integration, and a machine learning inference pipeline for scalable judgment processing.

EDUCATION

B.E. in Computer Science Engineering

Sri Venkateswara College of Engineering, Sriperumbudur, Tamil Nadu

2021 – 2025
CGPA: 7.52 / 10

Class XII

Government Higher Secondary School, Onnupuram, Tiruvannamalai, Tamil Nadu

2020 – 2021
85.5%

CERTIFICATIONS

Data Science Training Certificate — Internshala

8-week program covering Data Analysis, Data Visualization, Machine Learning, and AI; completed a Capstone Project with a final assessment score of 73%.

Aug 2024

Python Certification — HackerRank

Validated proficiency in Python fundamentals — data types, functions, loops, conditionals, and problem-solving techniques.

Mar 2026

SQL Certification — HackerRank

Validated proficiency in SQL querying, filtering, sorting, joins, aggregation functions, and data retrieval.

Mar 2026

Python Full Stack Development

Intensive training in Python, Django, HTML, CSS, JavaScript, and MySQL; built mini-projects covering end-to-end full-stack development and Git-based version control.

Aug – Dec 2025
